Company Profile

PT.Nam Indonesia

**NAM  
INDONESIA**

**PT.Niaga Artha Mandala Indonesia**

"Unity is strength...when there is teamwork and collaboration, wonderful things can be achieved."

"There is extraordinary chemistry that exists in long-term relationships."

**PT NAM Indonesia** is firmly established as a supplier of a high quality pneumatic and fluid control products from IMI Precision Engineering - a trademark that consists of a portofolio of well-known and leading brands, including IMI Norgren, IMI Buschjost, IMI FAS, IMI Maxseal and IMI Herion.

PT. NAM Indonesia is an Indonesia company whose business activity is involving in supply, install, maintain and support high quality pneumatic and fluid control products for cement industry, chemical & petrochemical industry, food processing industry, mining industry, oil & gas industry & tire industry. The company participates actively in government and private sector project.

PT NAM Indonesia started a maintenance, repair and operating supplies in 2019. In this business platform, we offer service to the oil & gas, petrochemical, mining, chemical & manufacturing industries.

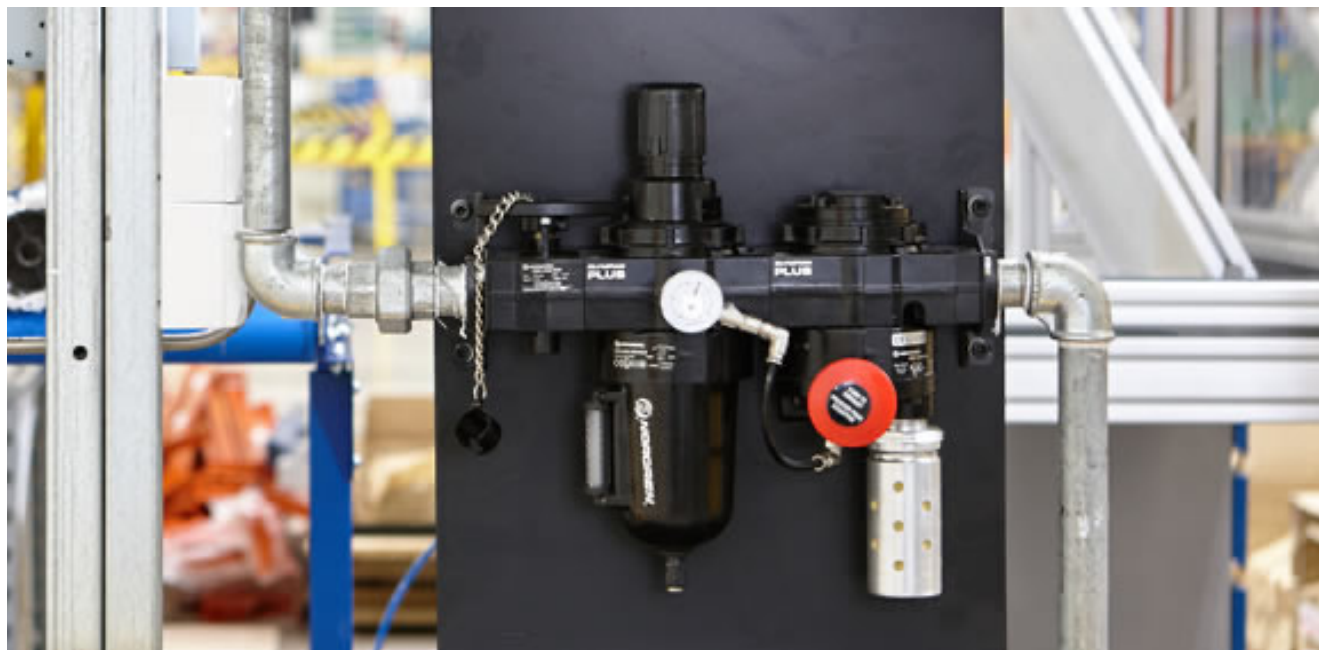

### **Mission**

To be the company of choice that meets the needs of business partner in our core business platforms.

### **Vision**

**PT NAM Indonesia** is committed to provide a value added solutions to our customers in each core business platforms by applying our diverse capabilities & technical excellence. We aim to establish long-term relationships based on trust with our suppliers to acquire products & services at the competitive rate, with the right quality and at optimal delivery condition. We aim to deliver the ultimate services that exceed customer expectations. We empower people in our organization with the skills and knowledge to confidently and happily carry out their roles.

## Our Solution Portfolio in Pneumatic & Fluid Control Products

**PT NAM Indonesia** is firmly established as a supplier of a high quality pneumatic and fluid control products from IMI Precision Engineering - a trademark that consists of a portofolio of well-known and leading brands, including IMI Norgren, IMI Buschjost, IMI FAS, IMI Maxseal and IMI Herion.

We offer a comprehensive range of products & solutions for pneumatic & fluid control applications such as actuators, air preparation products, pressure sensing, vacuum components, pneumatic valves, customized electro-pneumatic automation control cabinet and fittings & tubings.

### Actuators

Pneumatic actuators, often referred to as pneumatic cylinders or pneumatic drives, are the products used to provide motion and force to industrial automation applications. We offer a vast array of actuators – from full-size to compact cylinders, grippers, slide tables, rod-less cylinders, rotary actuators, switches and more.

### Air Preparation Products

Correct air preparation is essential for best performance.

We offer a full air preparation line air preparation equipment, from our advanced FRLs units to individual components including filters, regulators, and lubricators.

### Pressure Sensing

The pressure sensing devices provide a range of different options for converting pressure changes into an electrical signal to monitor a process pressure when a set pressure has been reached.

We offer various types of pressure sensing devices to meet various customer needs for measuring liquid or gas pressure.

## Vacuum Components

Vacuum is used in Industrial Automation applications, especially handling & packaging and manufacturing. Vacuum allows varied size and shaped objects to be picked up or held without any damage or bruising to the component.

As a partner to IMI Norgren, we can offer an extensive range of vacuum components.

## Pneumatic Valves

In industrial automation, solenoid valve can be as simple or as complex as your application requires. We can supply a wide variety of pneumatic valves from IMI Norgren.

## Fittings & Tubings

Fittings and tubing are absolutely essential to any pneumatic system, since nothing will operate without them.

## Pneumatic Cylinders & Actuators

Pneumatic cylinders, often referred to as pneumatic actuators or pneumatic drives, are used to provide motion and force to industrial automation applications. Norgren offers both single acting cylinders and double acting cylinders and their corresponding accessories & mountings. Our pneumatic cylinder ranges include profile cylinders, roundline cylinders, compact cylinders and rodless cylinders.

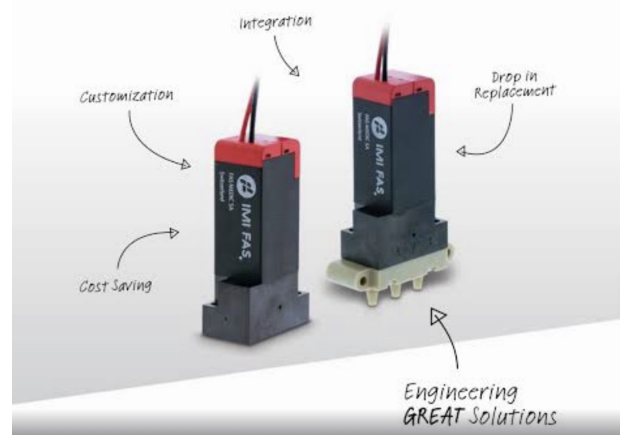

## IMI Herion

### Pneumatic Valves

In industrial automation, solenoid valve can be as simple or as complex as your application requires. We can supply a wide variety of pneumatic valves from IMI Norgren Herion

## SECTORS WE SERVE

Together with our partners that are well known for its range of high quality products, we commit to achieve fulfillment of customer requirements within the constraints of time, cost and quality.

Our customers include corporations in the following sectors:

- Oil Industry and Refineries
- Off-shore platforms
- Oil & Gas Terminals
- Chemical and Petro-chemical Facilities
- Oil and Gas Pipelines
- Road and Rail Tanker Loading Bays
- Power-plants
- Industrial Complexes
- Pharmaceutical
- Metallurgical
- Electronics
- Aerospace
- Paper
- Tobacco & Cigarettes
- Warehousing
- Ports
- Airports
- Vehicles
- Undergrounds & Railway stations
- Tunnels Fire Protection
- Radio & TV
- Hospitals
- Museums
- Cinemas
- Shopping Centers
- Commercial Centres
